PROFESSIONAL EXPERIENCE

Entrepreneur - E-commerce Operations & Digital Growth

2025 - Present

(Founder, D2C Apparel Brand) | Bengaluru

- Took a consumer apparel concept from idea -> brand -> business setup and registration -> online store -> customer acquisition -> conversion -> fulfillment -> retention, independently building and operating the business end-to-end.
- Established and operationalized the business in India, handling **Udyam registration, trademark registration, payment infrastructure, and related regulatory/operational documentation**.
- Built and operate the brand's **Shopify commerce stack** from scratch, including storefront architecture, theme customization, product pages, checkout, Razorpay, Meta Pixel & Conversions API, GA4, and Klaviyo.
- Own paid customer acquisition through **Meta Ads Manager and Meta Business Suite**, managing audience targeting, campaign setup, creative testing, budget/bid optimization, and day-to-day performance monitoring.
- Manage the **digital customer funnel** from acquisition through product discovery, landing/product-page experience, checkout, purchase, and post-purchase touchpoints, using analytics and customer behavior to identify improvements.
- Built **Klaviyo retention workflows** including welcome, abandoned-cart, and post-purchase automations; developed creator/affiliate acquisition through UGC outreach, barter, and commission-based partnerships.
- Own product, catalog, and fulfillment operations, including **pricing, product setup, size/fit specifications, launch preparation, COD logistics, vendor management, order processing, shipping, returns/exchanges, and customer support**.

- Use **AI-assisted web development and workflow automation** to accelerate webpage creation, content workflows, and recurring operational processes across the business.

Digital Operations & Performance Analyst

Jan 2025 - Aug 2025

(DXC Technology - Nissan Global Account)

- Managed high-volume **digital operations support** for a global Nissan account through email, phone, and chat, maintaining queue, resolution, and service standards.
- Managed operational queues and prioritized issues by urgency, business impact, and **SLA requirements**, coordinating resolution across relevant teams.
- Built **KPI reporting and performance documentation** covering queue volumes, SLA adherence, resolution trends, and operational performance.
- Analyzed ticket and resolution data to identify recurring bottlenecks, support process improvements, and improve **end-to-end operational efficiency**.

HR Operations & Process Analyst

Sep 2024 - Dec 2024

(Accenture via First Meridian - UPS Account)

- Managed high-volume **onboarding workflows** from initial contact through completion, tracking progression, exceptions, and process status across active cases.
- Maintained **data accuracy and workflow records in ServiceNow** across thousands of active cases, supporting reliable reporting and operational visibility.
- Coordinated with stakeholders to resolve workflow bottlenecks and translate operational issues into **practical process improvements**.

E-commerce & Customer Success Advisor

Feb 2023 - Oct 2023

(Best Buy Ecommerce Process)

- Provided technical support to Best Buy customers through a **24/7 service environment**, handling product, account, and post-purchase issues across customer interactions.
- Managed customer issues from first contact through resolution, developing strong understanding of **user behavior, purchase intent, and post-purchase experience**.
- Logged and analyzed customer interaction data in CRM systems to identify recurring friction points and improve the **support journey**.

PROJECTS

Shopify E-commerce Build - thedrooze

- Designed and built the brand's **Shopify storefront** from scratch, including homepage architecture, product pages, theme customization, checkout flow, responsive layouts, and AI-assisted development.

D2C Business Launch & Digital Commerce Setup - thedrooze

- Built the operating foundation for the D2C launch across **business registration, trademark, Udyam, Razorpay payments, Meta tracking, GA4, Klaviyo, product setup, fulfillment workflows, and vendor coordination**.
